## DUMP SPREADER

### ALL-HYDRAULIC DUMP SPREADER Package Price: \$14,500 P/N: DSW-270

Package Includes: Dump Spreader, Electronic Flow Control, Quick Mount Hitch, Support Stand, Built-In Splash Guard, Rims & Tires

The first all-hydraulic spreader on the market has a simple design and a versatility that makes it the obvious solution when spreading liquid or semi-liquid materials.

The electronic control allows operation from the comfort of the cab with an easy-to-adjust dial that regulates the dump speed in relation to expeller speed.

#### BUILT-IN STAND

Includes a sturdy support stand to store unit when not in use, and it swings out of the way for transport.

#### STANDARD SPLASH GUARD

Keeps material from splashing back at the tractor during transport.

Dual action expellers scoop and spread material approximately 20'. The box has a smooth interior and is continuously welded for strength, durability and no leaks. Material moves fast on the super-slick industrial grade finish.

It doesn't have a rear gate with seals or tracks that can leak, chains that can break or aprons that can freeze-up, even in the coldest of climates.

#### PATENTED DUMP MOTION

Unique patented dump motion keeps center of gravity low for steady operation over all types of terrain.

#### DUAL EXPELLERS

Dual action expellers are hydraulically driven to provide an aggressive and consistent spreading pattern.

The patented dump motion centers the load over the wheel base. As a result, the spreader remains balanced and steady.

It can be used for many applications, not just manure. It will work great as a dump box to haul snow, sand, wood chips, liquid tobacco waste, lime and more.

It quickly mounts on any 3-point hitch. The tongue has a built-in support stand. Struck capacity is 270 cu. ft. or 2000 gallons.

**NEW**

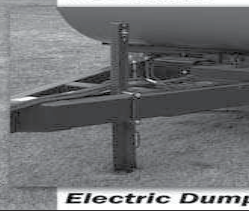

#### QUICK MOUNT

3-point mounting hitch keeps spreader level and offers a universal fit.

**No Aprons or Chains**

**Electric Dump**

DIMENSIONS	
Inside Box Width	60"
Inside Box Depth	56 1/2"
Overall Height	87"
Overall Height (when tilted up)	174"
Overall Length	224"
Overall Width (w/tires shown)	102"
CAPACITY	
Struck Cu. Ft.	270 cu. Ft.
Struck Cu. Gallons	2000 gal.
WEIGHT	
Load (Max recommended)	12 tons
Shipping (empty)	4500 lbs
HYDRAULICS	
Add PFC components	\$145.00
DRIVE	
Minimum HP Req.	80 HP
Minimum Hydraulic g/m	10gpm
Expeller Speed	80 rpm at 10gpm
EXPELLER	
Spread Width	20'
No. of Expellers	2
