**ENSURE SEED-TO-SOIL CONTACT  
A CRUMBLY SEED BED  
AND GOOD SOIL CLOSURE FOR  
IDEAL GERMINATION CONDITIONS**

# GW 250 M1 GRASSLAND CULTIPACKER ROLLER

Our GW Series cultipackers come with either a Cambridge or a toothed-ring roller. Ideal for firming and smoothing a seed bed, the GW 250 M1 is a compact solution that works well alone or with our PS Air Seeders for seeding food plots, PS D Air Seeders for granular fertilizer, or MDP seeder/spreaders. Both roller types also work well in grass for reseeding/overseeding, ensuring excellent seed to soil contact. (Shown with options)

Cambridge rollers come in 15.4" and 20.9". Rollers spin freely to follow contours without ripping the surface.

The toothed-ring roller design creates a self-cleaning roller. It works well in both existing grasses and newly tilled soil.

APV cultipackers with optional seeders come with a convenient step and platform, making hopper filling easy.
