BI-FOLD™ WHEEL RAKES

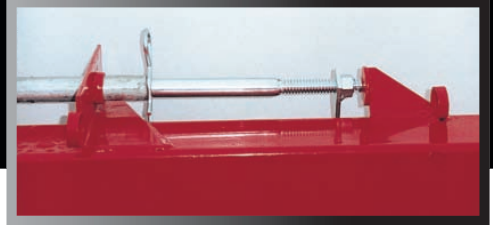

HI-CAPACITY™ WHEEL RAKES

The Hi-Capacity rake opens and closes hydraulically, rake wheels are lowered and raised hydraulically, and the rake wheels float independently.

A 2 or 3 wheel center kicker assembly is optional for the Hi-Capacity rakes.

The adjustment for the ground pressure on the rake wheels allows the operator to fine tune the 12, 14 wheel Hi-Capacity rakes to fit varying conditions.

**BUILT WITH
QUALITY!
STRONG AND
DEPENDABLE**

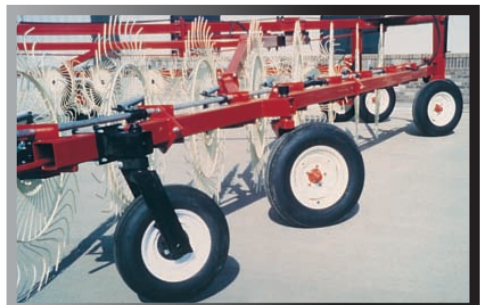

An optional rake wheel wind board is available for all H&S bi-fold rakes.

An adjustable brake band on top of the front spindle keeps the front gauge wheels from spinning in rough conditions.

The high open, adjustable rear frame allows for the heaviest crop to pass through. Windrow width adjustment is done with a hand crank.

An optional set of 15" front gauge wheels for the 14 wheel Hi-Capacity rakes help improve float over irrigation tracks or rough ground.

WHEEL HI-CAPACITY™ BI-FOLD

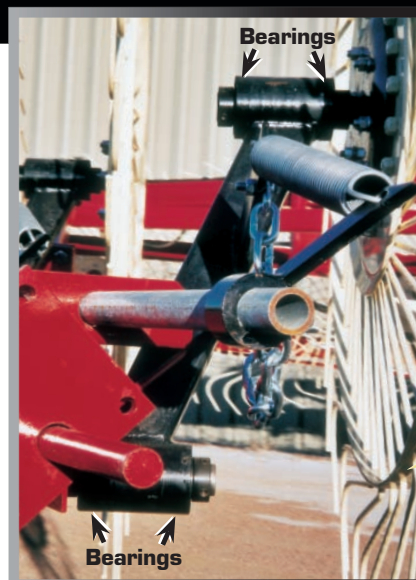

The H&S Hi-Capacity bi-fold rakes have the raking wheels positioned ahead of the rake arms, main frame beams and transport wheels. Coupled with a high and wide end of frame there are no hangup points or restrictions when raking the heaviest of hay crops.

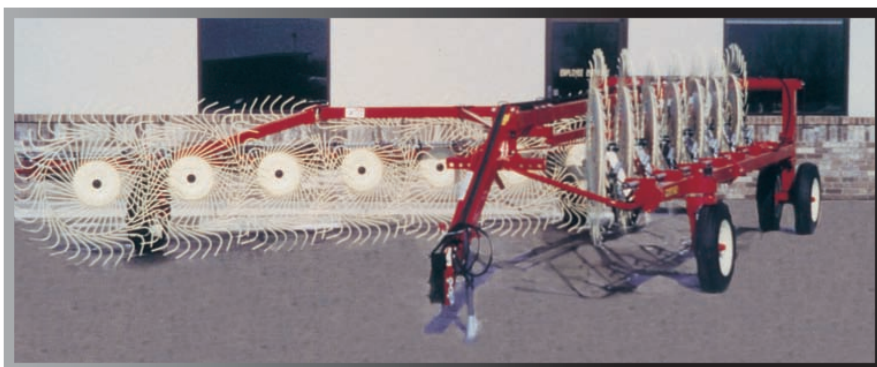

H&S Hi-Capacity rakes fold up to 8'6" or less with the touch of a lever for road transport or to go through gates.

The rake arms on the 14 wheel hi-capacity rakes feature 2 roller bearings (see photo) on each end of the arm for long life, smooth operation and less wear than rakes with bushings.

Limited oscillating offset tandem transport wheels assure a smooth, level ride, even over irrigation tracks. Standard on the 14 wheel Hi-Capacity, optional on the 12 wheel Hi-Capacity.

The Hi-Capacity rake can be configured as both a v-rake or with the right side open as a trailer rake.
