

Ideal For Conservation Corn Ground Preparation

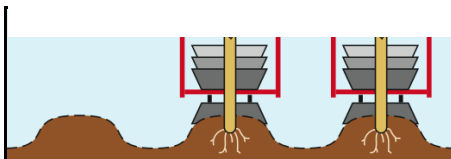

McFarlane's No-Till Stalk Chopper is an excellent way to chop standing stalks. This 3-point mounted machine features two rows of spiders holding reels with 8 hardened steel chopping knives on the front bar and 6 hardened knives on the rear bar. The front row chops the ridge stalks and the rear row is offset for valley tilling. The spiders are design to permit adjustable row spacing. In addition, chopping knives can be set to run straight or at right or left angles. This permits McFarlane's Stalk Chopper to work efficiently in practically any ridge-till field.

***Features***

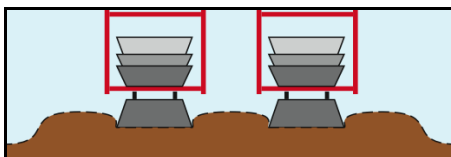

- 7" square heavy-wall toolbar
- Combination CAT II/III hitch
- Flexible or rigid connectors
- 21" & 12" wide chopping blades
- Wide units have folding toolbar

Sizes & Options

- Single and Double toolbar
- Sizes from 4 row 30" to 12 row 36"
- Optional gauge wheels
- Optional 3-bar flexible spike tooth harrow
- Optional 5-bar flexible spike tooth harrow

Front row chops ridge stalks

Rear row chops valley

McFARLANE SEEDBED CONDITIONER

3-Point Spiral Reel Stalk Chopper

Features

- Hardened spiral blades
- Triple-lip seals on reel bearings
- 7" square heavy-wall toolbar
- Optional double spiral reels
- Adjustable gauge wheels
- Optional feathering board
- Optional rolling basket
- Optional 5-Bar Harrow

The Seedbed Conditioner is a multipurpose field preparation tool used for either chopping stalks and/or preparing fields for planting. It is a unique combination of tools that can chop stalks, stir loosened soil and leave a level seedbed. With several options, the Seedbed Conditioner can be tailored to a grower's specific needs. With either a rigid or folding toolbar, the units can be configured to virtually any row spacing and cutting width, up to a 12 row 40" configuration.

Raised-Bed Conditioner

When equipped with cultivator sweeps and double rolling basket, the Seedbed Conditioner is an ideal tool for using on crops grown on raised beds. Remove the previous crop's root ball and prepare the top of the bed for planting by removing the crust and leaving it level. Gauge wheels provide a consistent operating height and ensure a consistent bed height. The full width spiral reels and rolling baskets ensure complete coverage across the machine.

Superior Tools for Better Yields!

C3-7000

- Chop, crimp, and condition with one tool.
- One-piece frame for easier assembly and less maintenance.
- No wing pull cable or bracket.
- Open frame area for mounting cover crop seeder or chemical applicator.
- Open-centered reel with maintenance free hubs and double bracket for added strength.
- 12" gap reels with rubber torsion cord suspensions create full-width coverage.
- Radial tires come standard.

MODEL	Cutting Width	Transport Width	Transport Height	Weight	List Price
C3-7020-3RB	21'-1"	15'	10'-9"	7,960 lbs.	\$44,931

ROLLER CRIMPER

Roller Crimper

- Crimp mature cover crops to kill without chemical application.
- Crimp immature cover crops to provide mulch, which suppresses weeds.
- Lightly till in cover crop seeds; size residue at the same time.
- Full width coverage, using Dura-Reel.
- Sizes up to 12 row 30", folding and rigid toolbars.
- Unique bearing guard protects against wrapping/plugging.
- Blades will penetrate ground in uneven conditions to get full crimp.
- Setup on rear or front mount 3 point.
- Weight built into frame, 7x7 toolbar.
- Beveled blades require less weight than conventional crimpers that use flat bars.
- Aggressive blades can also be used to incorporate seed.

APPROXIMATE SETUP TIME:

SPR 6R30-DC = 6-8 hours

SPR 12R30F-DC = 12-14 hours

MODEL	Size	Tool Bar	Weight	List Price
