PH OUTDOORS™

PH Outdoors G-SERIES No-Till drill was developed with the hunter & wildlife manager in mind. The G-SERIES is a true, no till drill that will plant a variety of seeds and blends into the ground, even in the toughest soil conditions. The G-SERIES features tempered cutting discs, spaced at 7.5 inches apart. The discs slice into the soil, allowing the seeding mechanism to plant the seeds into the created slits and solid, rubber packing wheels trail behind the discs to close up the soil. The G-SERIES will provide outstanding seed to soil contact even when cutting through standing vegetation.
